SUMMARY

To secure employment as a software engineer/ web developer to utilize my software installation and configuration skills to meet the needs of company clients and being a best leader for my team to take all over responsibility of my team always supported to every one until front of one is also efforts on itself. Maximus time taking long way to doing works and submit my work in very short way because I am always trying to reduce my hard work into smart work because this experience gives an opportunity to take my juniors on top without wasting their time. "I believe on support until when they doing efforts."
